

ADVANTAGES

- Patented pressure drop port for easy monitoring
- Optional built-in or external clips for easy installation
- Non-discharging, high efficiency media
- High burst strength > 6250 Pa (25" w.g.)
- Pre-filter with longer life and a lower and stable pressure drop
- Lightweight and easy to install
- Can be used as hydrophobic or a coalescing air filter

| | |
|---------------------------------|---|
| Application | Suitable for most areas including wet and coastal |
| Frame | Plastic moulded |
| Gasket | Polyurethane, endless foamed |
| Media | Glass fiber; Synthetic |
| Separator | Hot-melt |
| Max. final pressure drop | 450 Pa |
| Max Temperature (°C) | 70°C |
| Relative Humidity max | 100% |
| Installation Options | Integrated clip on or optional without clip. Separate metal clip available. |
| Comment | Additional Product Features: High mechanical strength, Optimal coalescing performance, High strength plastic frame, Downstream media support, Patented pressure drop port, Downstream spacer for optimal airflow, Can be fitted directly to a final filter with built-in clips. |

The CamClose is Camfil's new generation panel air filter designed to extend the service life of final filters. By adding the CamClose pre-filter in front of the final filter, overall filtration efficiency is further improved.

CamClose has a user-friendly design, robust construction, and best-in-class water handling properties. These features make it an excellent pre-filter for most turbomachinery and gas turbine applications. It is especially suitable for humid conditions such as tropical and coastal installations. The CamClose pre-filter has been engineered to enable hassle-free operations, increased performance and offers excellent protection.
